Worth County Multi-jurisdictional Hazard Mitigation Plan Update Approved

The State Emergency Management Agency (SEMA) and the Federal Emergency Management Agency (FEMA) have approved the Worth County Multi-jurisdictional Hazard Mitigation Plan Update. The Plan will be in effect for five years and will expire March 4, 2027.

The Northwest Missouri Regional Council of Governments conducted meetings with city and county officials, emergency management agencies, school leaders, stakeholders, and other interested individuals to update the hazard mitigation plan and reduce the negative impacts of natural hazards in the future. With an approved plan, Worth County's participating jurisdictions will be eligible for state hazard mitigation grant funding opportunities.

The Northwest Missouri Regional Council of Governments would like to thank everyone who participated in the Plan update process. To view the Plan, please access it on the Regional Council's website at <https://nwmorcog.org/programs/hazard-mitigation/>. If you have any questions regarding the Plan, please email them to Amy Dowis, Regional Planner, at amy@nwmorcog.org.
